

ms2-tools overview

ms2par: *Read parameters and their values from par files and show these parameters in a nice GUI, where user can edit or create these files easily.*

ms2chart: *Read values from *.rav, *.run and couple of other format, and plot these values in a line or dotted graph.*

ms2molecules: *Read *.vim files and perform molecular simulation. built in C but has java based GUI wrapper around it.*

ms2potmod: *Create molecular structure, perform geometry operations, calculate bond, angle and dihedrals and use java3D API to show it on scene graph in 3D. Also read *.pm files to recreate structure.*

ms2-tools specification

1 - Programming languages: **Java**

2 - Framework: **Swing**

3 - Build:

ms2par, ms2chart, ms2molecules : **Java JDK 1.7**

ms2potmod: **Java JDK 1.8**

4 - Packages: **Netbeans 8.0.2**

5 - Additional libraries:

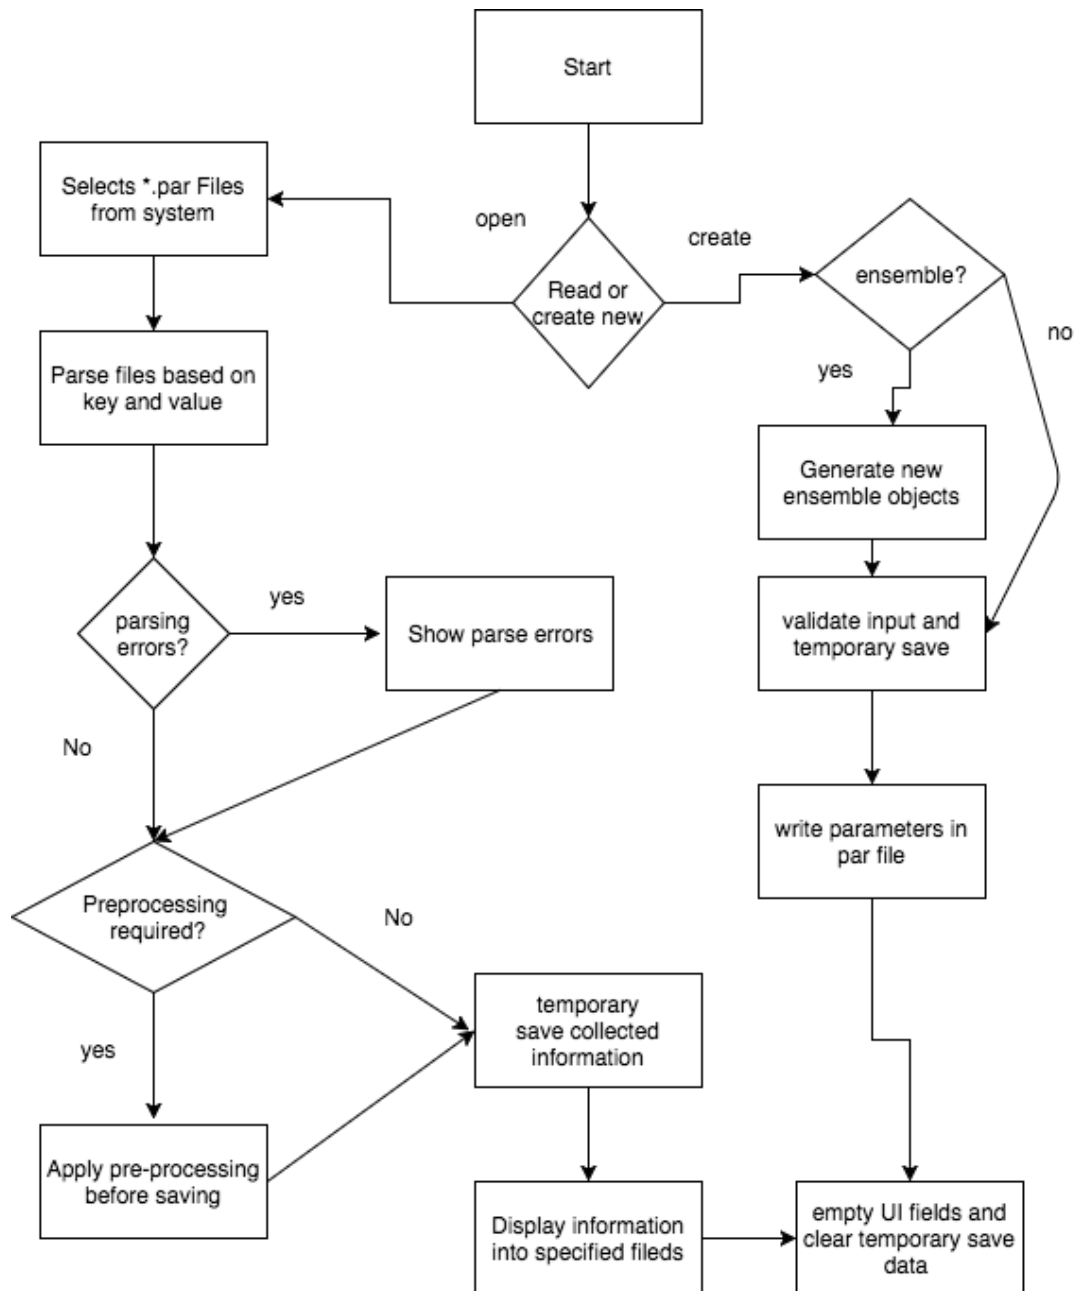

ms2potmod: **j3dcore.jar, j3dutils.jar, poi-*.jar, vecmath.jar**

ms2chart: **poi-*.jar, jfreechart-org.jar**

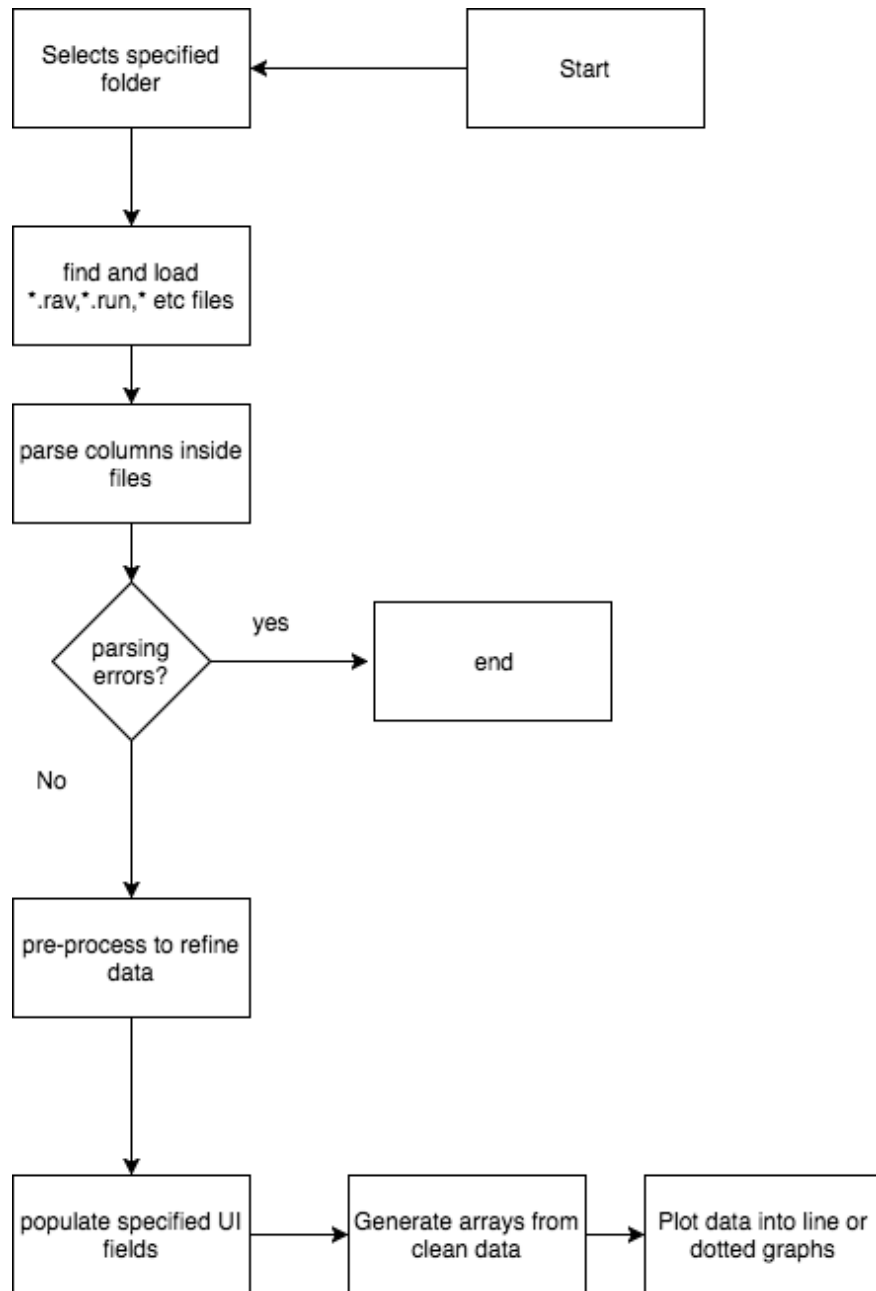

ms2par: **poi-*.jar**

ms2-tools functionality

ms2par:

ms2chart:

ms2potmod:
